Currently

I work at atSistemas, a software consulting company in Spain.

Noteworthy Work Experience

RTVE Alacarta

http://www.rtve.es/alacarta
RTVE site exposing multimedia contents on demand.

I played a **development technical leader** role at the following activities:

- Web/Portal Development Platform.
- Legacy CMS migration.
- REST Content API design.

MMA Workflow

Java customized Workflow Engine for internal bussinnes processes.

I participated as **java programmer** at the workflow design and as **technical leader** to development teams.

XQUID framework

http://www.xquid.org/
atSistemas RIA component oriented development framework based on HTML and JavaScript.

I participated as **HTML and javascript programmer** at design and implementation of the components palette.

SEA framework

Web application development suite, composed by a Struts/Portal enhanced execution engine, and an eclipse web-flow visual editor.

I participated as:

- **Java programmer** at the eclipse plugin development team.
- **Web application development consultor** for SEA customers:
    - MMA success story
    - Allianz success story
